Main Admin System Flowchart

Page 1 of 4 - Login and verified Admin authorization

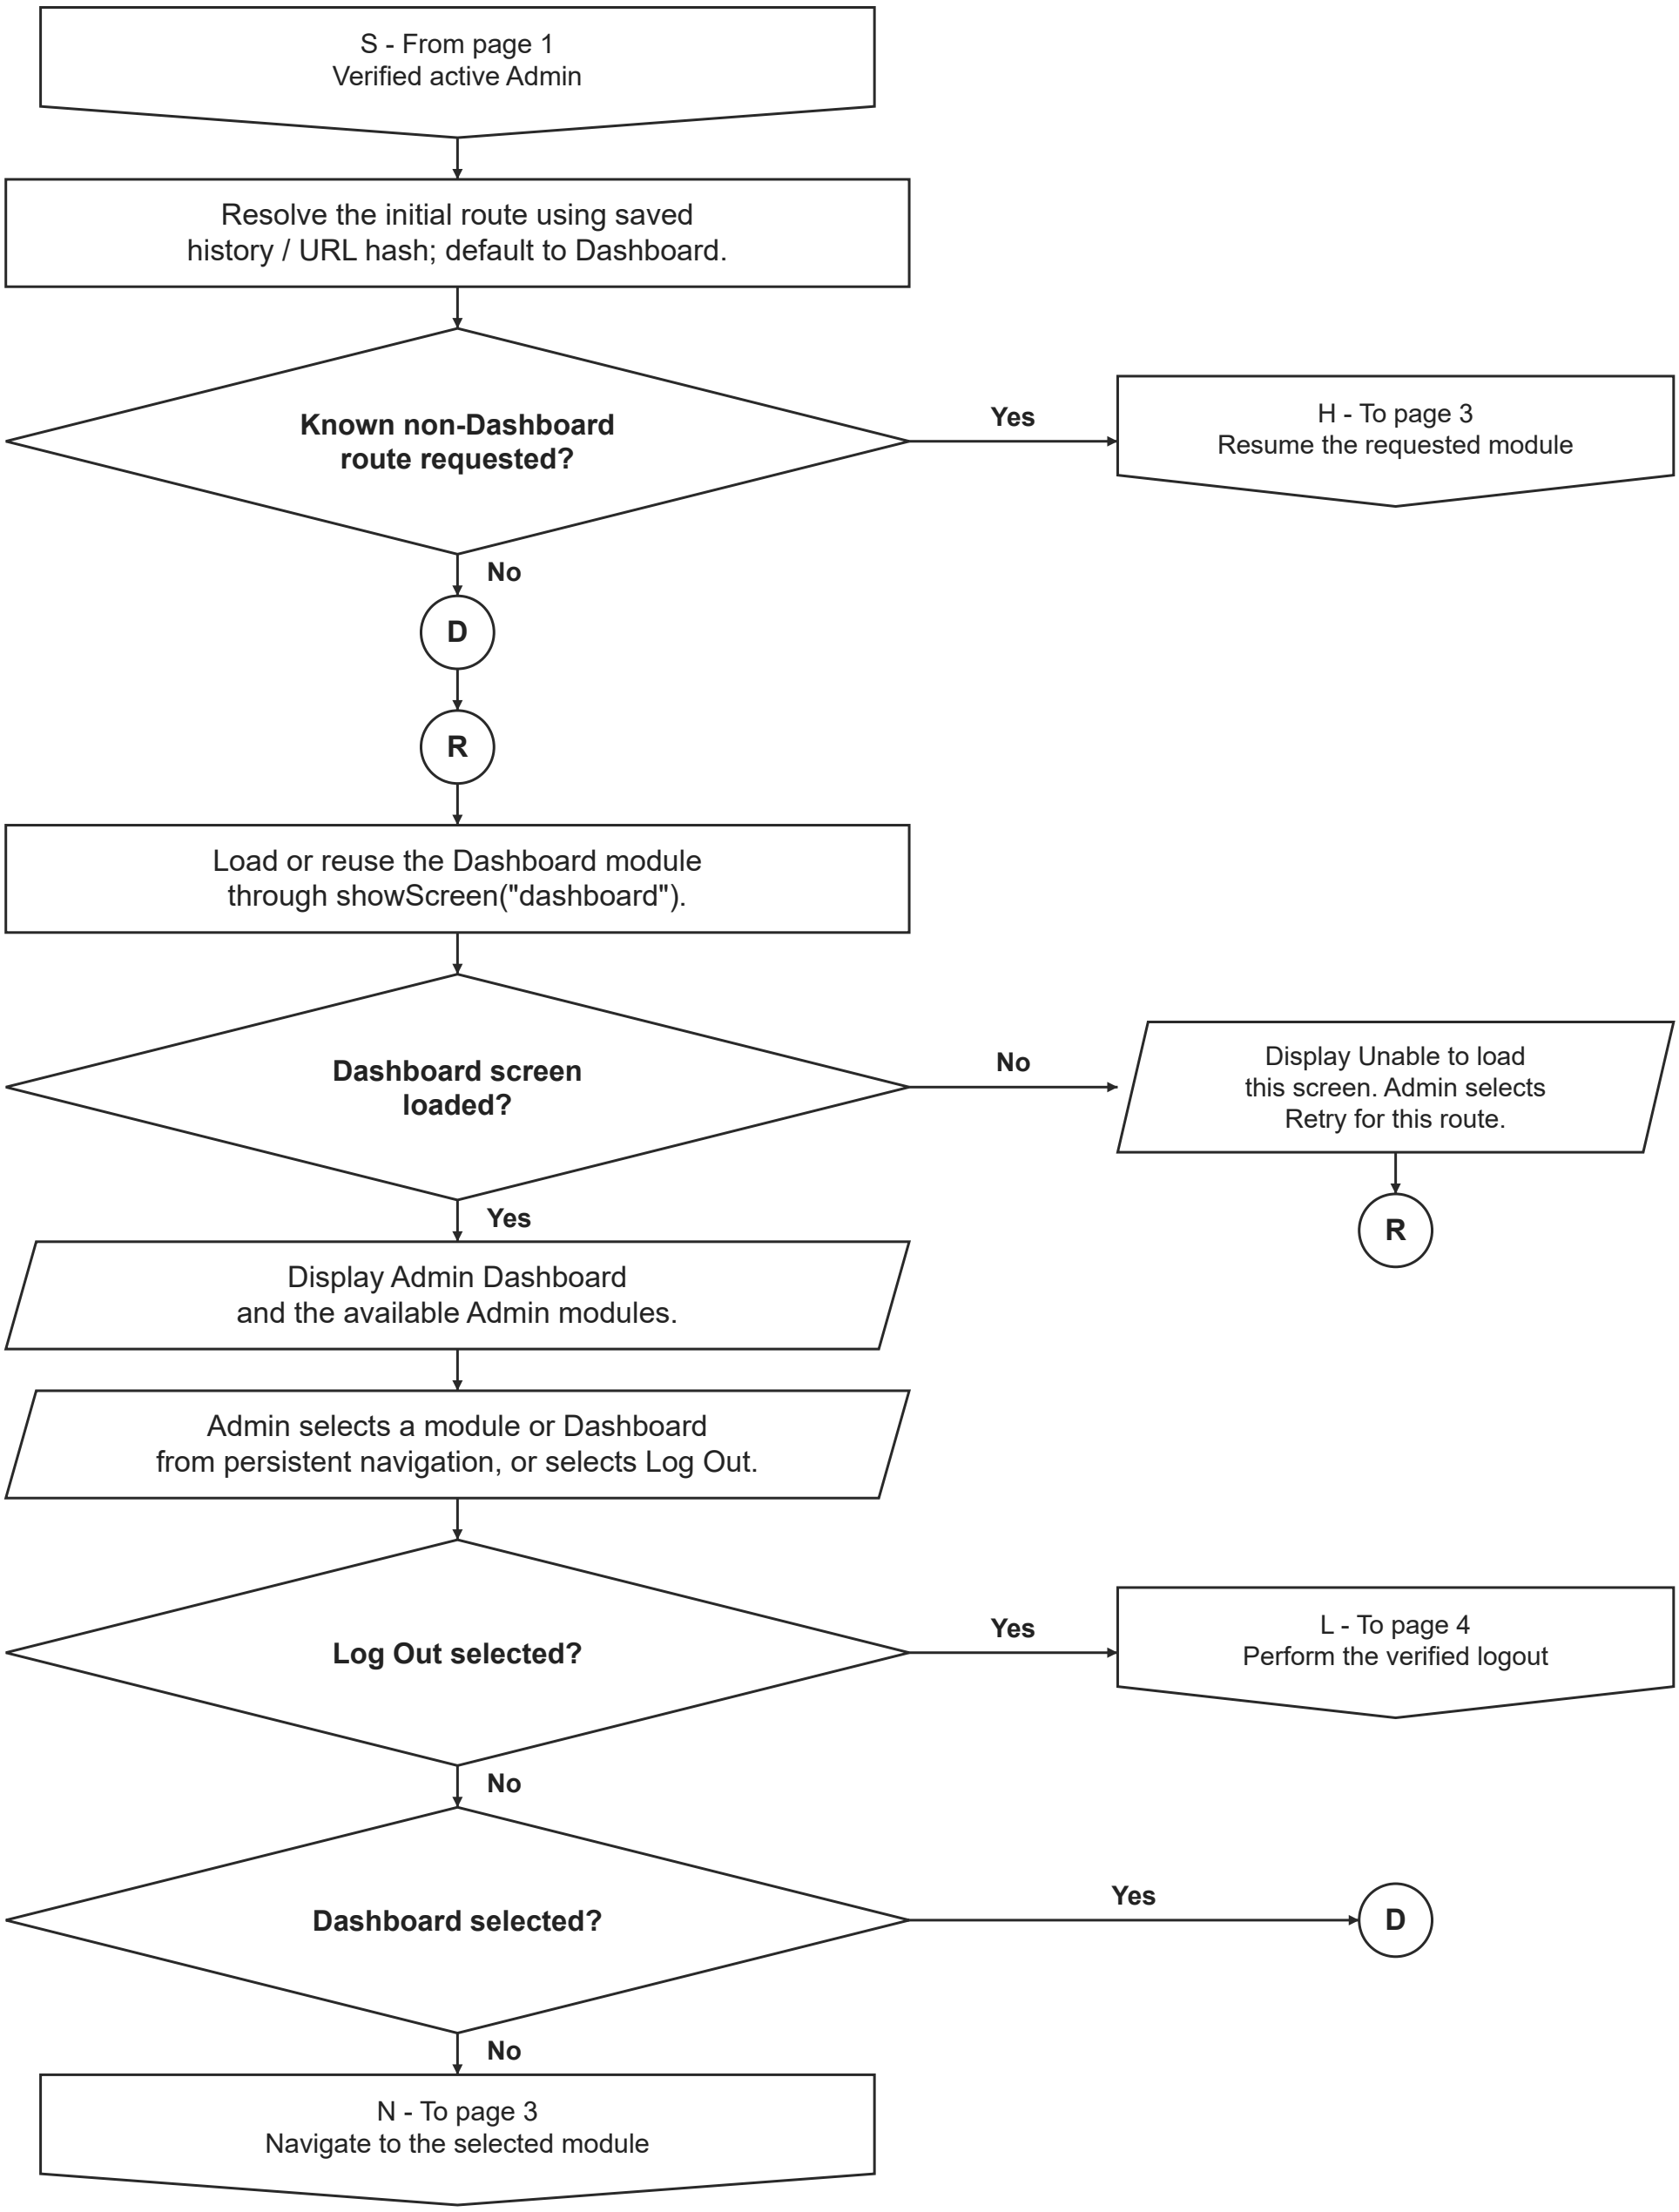

Interactive company sign-in path. A retries credential entry. Other active roles enter their own permitted workspace; they are not rejected solely for being non-Admin.

Main Admin System Flowchart

Page 2 of 4 - Dashboard, persistent navigation and module selection

D returns to Dashboard loading. R retries a failed Dashboard load. The persistent sidebar and account menu also remain available in loaded modules. Module details are deferred to Stage 2.

Page 3 of 4 - Verified module destinations - Stage 1 only

N - From page 2
Selected module from navigation

H - From page 2
Known non-Dashboard initial route

C

C

Which module owns the selected route?

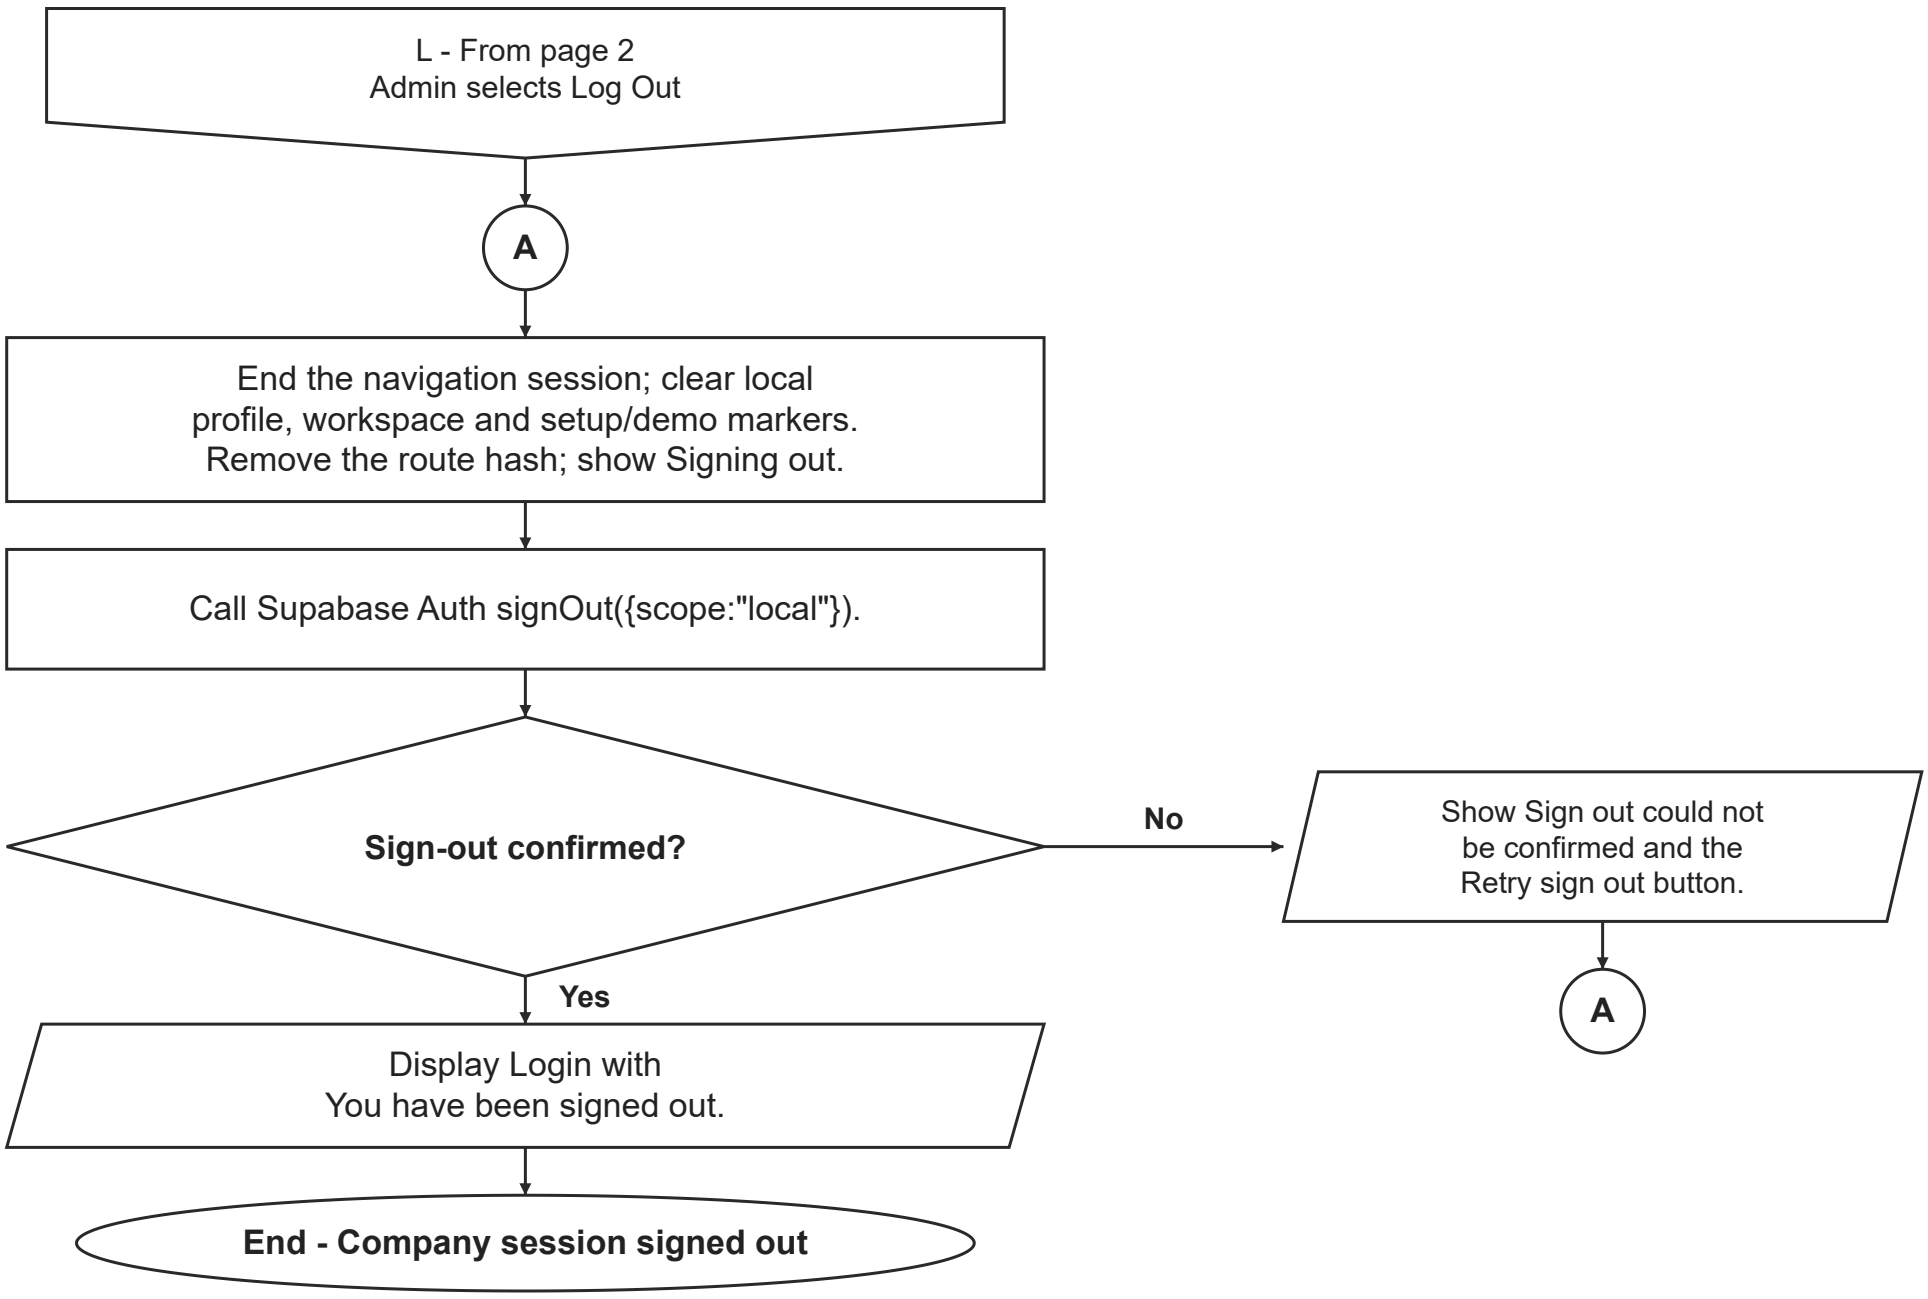

masterlist tool-profile	Navigate to Equipment Tracking	M01 - Equipment Tracking PLANNED — STAGE 2
sites site-detail	Navigate to Projects	M02 - Projects PLANNED — STAGE 2
request	Navigate to Requests	M03 - Requests PLANNED — STAGE 2
transfer	Navigate to Transfers	M04 - Transfers PLANNED — STAGE 2
return	Navigate to Returns	M05 - Returns PLANNED — STAGE 2
repair	Navigate to Repairs	M06 - Repairs PLANNED — STAGE 2
missing	Navigate to Missing	M07 - Missing PLANNED — STAGE 2
consumables	Navigate to Material Requests	M08 - Material Requests PLANNED — STAGE 2
purchase	Navigate to Purchases	M09 - Purchases PLANNED — STAGE 2
reports	Navigate to Reports	M10 - Reports PLANNED — STAGE 2
activity	Navigate to Activity Logs	M11 - Activity Logs PLANNED — STAGE 2
users	Navigate to People & Accountability	M12 - People & Accountability PLANNED — STAGE 2
settings	Navigate to Settings	M13 - Settings PLANNED — STAGE 2

Follow exactly ONE labeled exit for the selected route. The common vertical line is a shared choice bus, not parallel execution. M01-M13 are future module flowcharts: PLANNED - STAGE 2.

Main Admin System Flowchart

Page 4 of 4 - Verified company logout and retry

Logout clears the local UI and navigation before Supabase confirms sign-out. A retries unconfirmed sign-out. The call uses scope: local; this diagram makes no claim about other devices.
