Equipment return and Office receiving

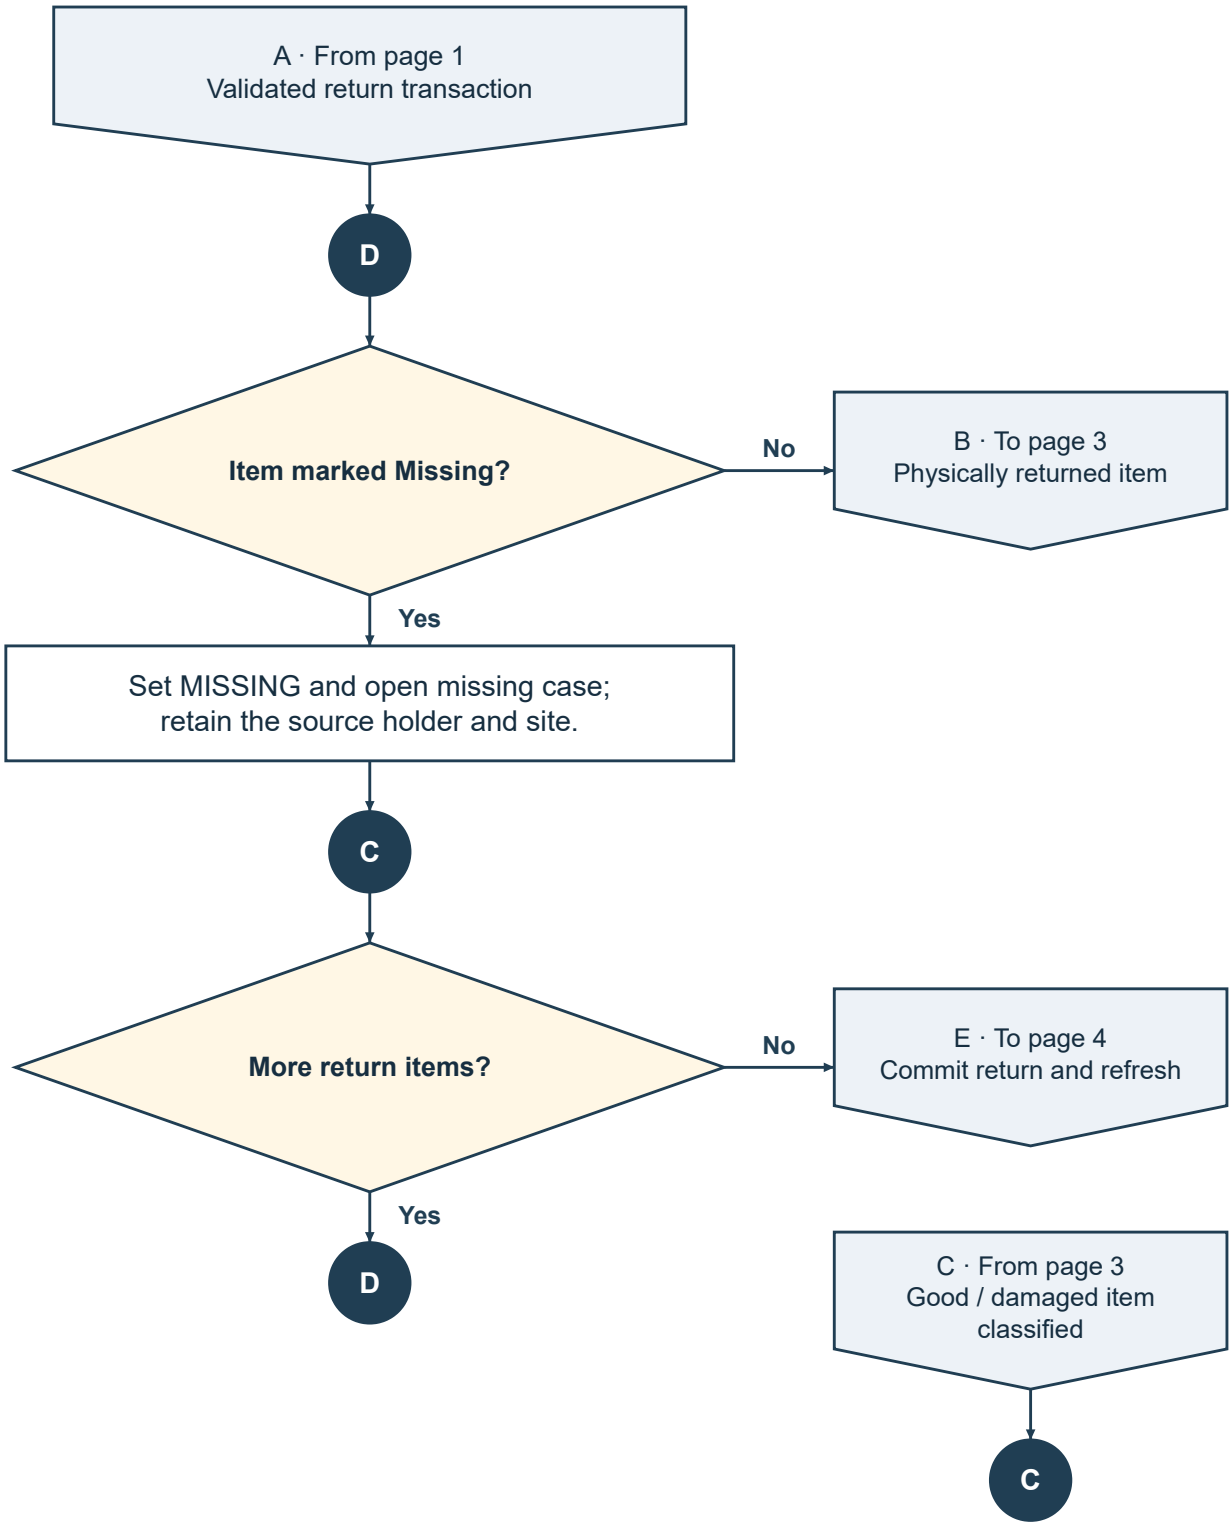

1 / 4 · Office destination and return inspection

Backend rejects forged destinations. No QR receipt or separate Admin acceptance stage exists for Office returns.

Equipment return and Office receiving

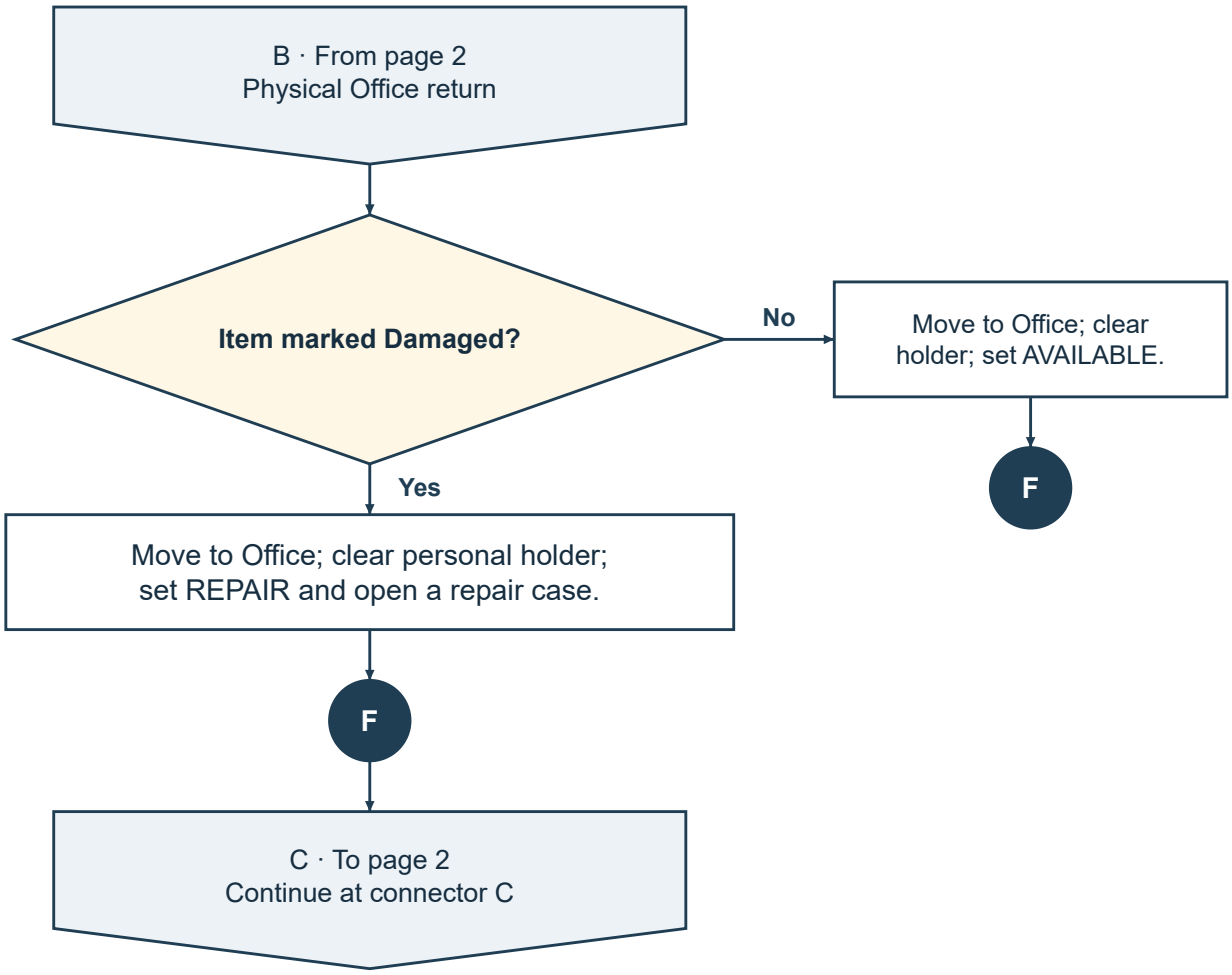

2 / 4 · Physical return or missing record

D repeats classification for the next item. C joins completed classifications. The return is one atomic operation.

Equipment return and Office receiving

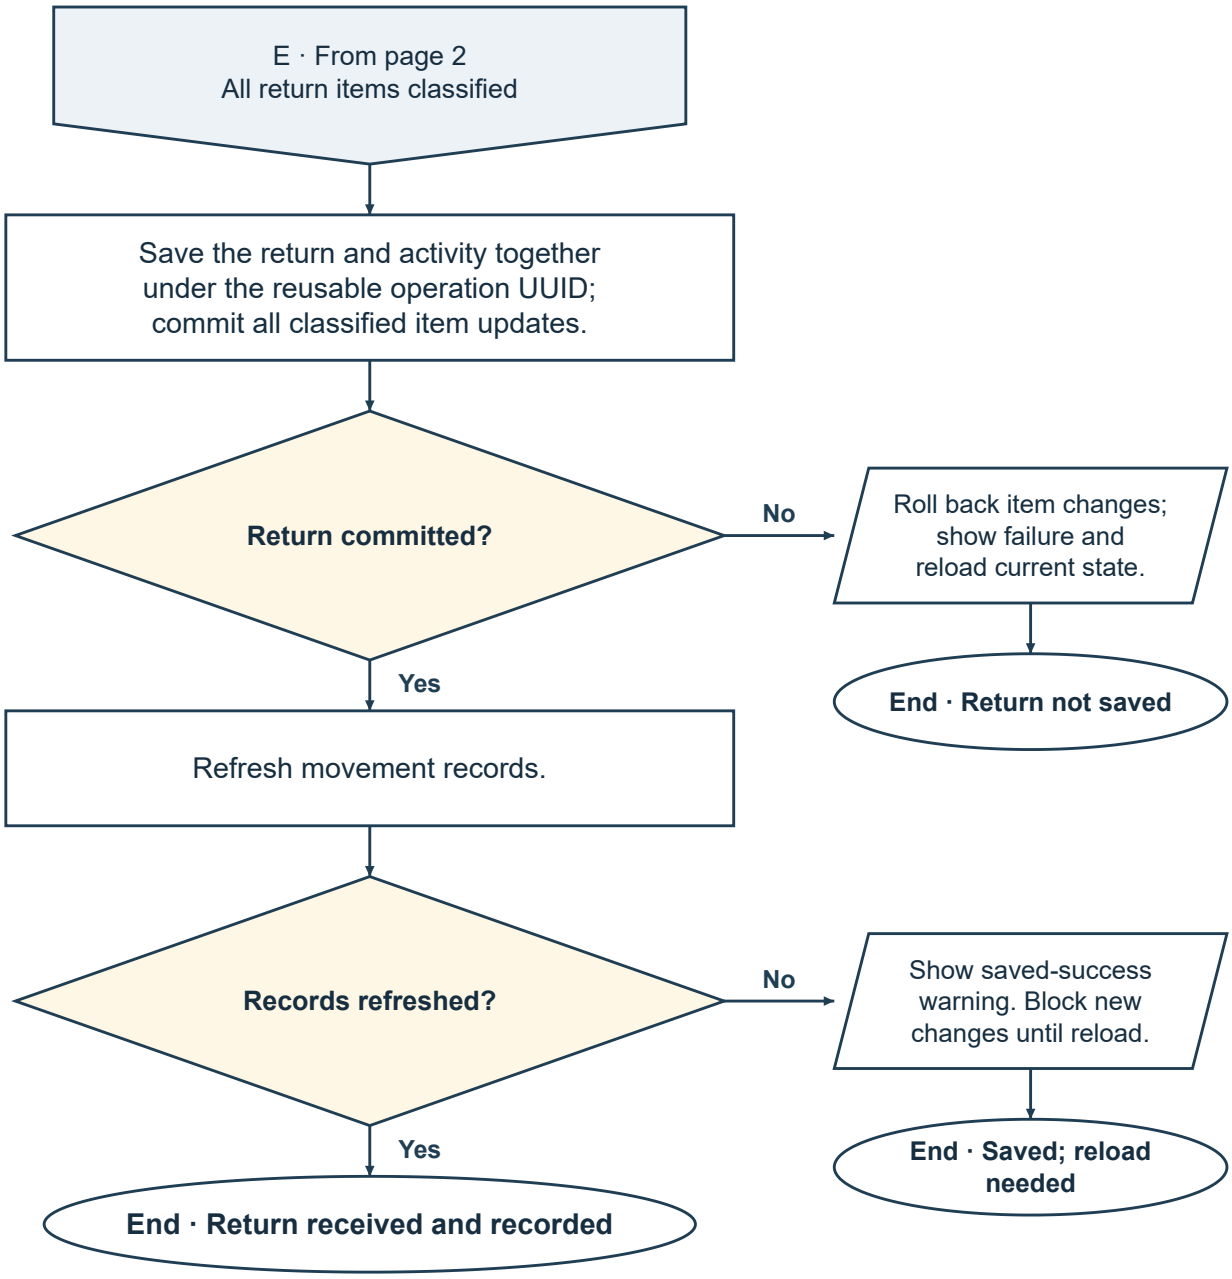

3 / 4 · Good or damaged physical return

Damaged physical returns clear personal custody in the Office-return wrapper. Missing tools never move to Office through this path.

Equipment return and Office receiving

4 / 4 · Atomic return and refreshed records

A retry reuses the saved operation identity and historical destination. There is no pending-return approval state.
