BREAKDOWN OF ONE TIME COST WORKSHEET

Assumed project development duration: 3 MONTHS (part-time project fees)

A. Development Cost

Description	Fee/Month	Mo.	Sub_Total
System Analyst (PT)	10,000.00	3	30,000.00
Programmer (PT)	20,000.00	3	60,000.00
Encoder (PT)	5,000.00	1	5,000.00
Research / QA (PT)	6,000.00	2	12,000.00
TOTAL			**107,000.00**

B. User Training

Description	Honoraria/day	Sub_Total
User Training (2 days)	1,500.00	3,000.00
Training Kit	1,000.00	1,000.00
TOTAL		**4,000.00**

C. ADDITIONAL HARDWARE/SOFTWARE

Description	Unit Cost	Sub_Total
Cloud Database Setup	1,000.00	1,000.00
External Drive	2,500.00	2,500.00
Open-source Tools / Free SSL	0.00	0.00
TOTAL		**3,500.00**

Total One Time Cost = Total Development Cost + Total User Training + Total Additional Hardware/Software

BREAKDOWN OF ONE TIME COST WORKSHEET

A. Development Cost	107,000.00
B. User Training	4,000.00
C. Additional Hardware/Software	3,500.00
TOTAL ONE TIME COST	**114,500.00**

Total One Time Cost = Total Development Cost + Total User Training + Total Additional Hardware/Software

RECURRING COST

Description	Rate (PHP)	Annually
Software Maintenance	750.00	9,000.00
Cloud Database + Storage	1,625.00	19,500.00
Static Frontend Hosting	0.00	0.00
Incremental Communication	200.00	2,400.00
Domain Renewal (year)	900.00	900.00
Software License Renewal	0.00	0.00
TOTAL		**31,800.00**

PHP EST.

All financial figures are planning estimates in PHP, not actual company expenses. Maintenance, hosting and communication rates are monthly; renewals are annual. Free or bundled items are explicitly shown as 0.00. See Planning Basis for assumptions and sources.

Training Kit	1,000.00	1,000.00
TOTAL		**4,000.00**

C. ADDITIONAL HARDWARE/SOFTWARE

Description	Unit Cost	Sub_Total
Cloud Database Setup	1,000.00	1,000.00
External Drive	2,500.00	2,500.00
Open-source Tools / Free SSL	0.00	0.00
TOTAL		**3,500.00**

Description	Rate (PHP)	Annually
Software Maintenance	750.00	9,000.00
Cloud Database + Storage	1,625.00	19,500.00
Static Frontend Hosting	0.00	0.00
Incremental Communication	200.00	2,400.00
Domain Renewal (year)	900.00	900.00
Software License Renewal	0.00	0.00
TOTAL		**31,800.00**

Total One Time Cost = Total Development Cost + Total User Training + Total Additional Hardware/Software

PHP EST.

The estimated one-time investment is PHP 114,500.00: development PHP 107,000.00, user training PHP 4,000.00, and deployment/backup hardware PHP 3,500.00. Estimated annual recurring cost is PHP 31,800.00. These figures form a planning scenario and are not actual company spending or approved vendor quotations.

The green company monitoring table records 758 units across 26 equipment categories. It identifies 19 round shovels, 75 GI pipes and 369 swivel clamps under “Missing or No Report,” totaling 463 units. These are reconciliation gaps; the table does not establish confirmed financial losses.

Estimated annual operational value is PHP 80,290.00, comprising PHP 4,690.00 in supplies cash savings and PHP 75,600.00 in released staff capacity. The capacity value is not payroll savings. Supplies savings alone do not cover the PHP 31,800.00 yearly running cost; the net cash requirement remains PHP 27,110.00 per year.

• Benefit

Breakdown of Tangible Benefit Worksheet

A. SUPPLIES COST

EXISTING SYSTEM			
Description	**Qty**	**Price/Qty**	**Sub_Total**
Folders (bundle)	4	150.00	600.00
Ballpen (box)	3	150.00	450.00
Bond Papers (ream)	12	250.00	3,000.00
Carbon Paper (pack)	1	150.00	150.00
Record Book (pc)	6	80.00	480.00
Vouchers (pad)	12	60.00	720.00
Ink (bottle)	6	350.00	2,100.00
TOTAL			**7,500.00**

PROPOSED SYSTEM			
Description	**Qty**	**Price/Qty**	**Sub_Total**
Folders (bundle)	2	150.00	300.00
Ballpen (box)	2	150.00	300.00
Bond Papers (ream)	4	250.00	1,000.00
Record Book (pc)	2	80.00	160.00
USB (piece)	0	400.00	0.00
Ink (bottle)	3	350.00	1,050.00
TOTAL			**2,810.00**

Supplies Cost Reduction = Total Supplies of the Existing System − Total Supplies of the Proposed System

Supplies Cost Reduction	**4,690.00**

B. LABOR AND PRODUCTIVITY VALUE

EXISTING SYSTEM		
Activity	**Allocated Cost/ Month**	**Annual**
Inventory monitoring	6,000.00	72,000.00
Report preparation	2,400.00	28,800.00
Reconciliation / follow-up	3,600.00	43,200.00
TOTAL		**144,000.00**

PROPOSED SYSTEM		
Activity	**Allocated Cost/ Month**	**Annual**
Inventory monitoring	3,000.00	36,000.00
Report preparation	900.00	10,800.00
Reconciliation / follow-up	1,800.00	21,600.00
TOTAL		**68,400.00**

Productivity Value = Existing Allocated Labor Cost − Proposed Allocated Labor Cost

Labor Productivity Value	**75,600.00**

Total Annual Tangible Value = Productivity Value + Supplies Cash Savings

Total Annual Tangible Value	**80,290.00**

Estimated annual supplies spending falls from PHP 7,500.00 to PHP 2,810.00, a potential cash saving of PHP 4,690.00. Allocated labor falls from PHP 144,000.00 to PHP 68,400.00, releasing capacity valued at PHP 75,600.00 per year. Combined tangible value is PHP 80,290.00; no salary or headcount reduction is assumed.

No equipment-loss or recovery saving is credited (PHP 0.00). The 463 missing or unreported units remain a reconciliation concern, not confirmed losses. A USB purchase is unnecessary in this scenario because cloud reporting and the separately budgeted backup drive are available; its subtotal is PHP 0.00.

HAND TOOLS AND OTHERS MONITORING

ITEM NO.	POWER TOOLS	QTY.	NEED TO COMPLY	MISSING OR NO REPORT
1	SHOVEL (PALA, LAPAD)	19	—	—
2	SHOVEL (PALA, BILOG)	23	42	19
3	BARETA	13	—	—

17	GI PIPES	225	300	75
18	BASE JACK	27	—	—
19	U-JACK	56	—	—
20	BUCKETS	39	—	—
21	CATWALK FLATFORM SCAFFOLDING	33	—	—
22	H-FRAME SCAFFOLDING	64	—	—
23	BRACES SCAFFOLDING	41	—	—
24	WATER-PUMP	2	—	—
25	GARDEN SPRINKLER	2	—	—
26	SWIVEL CLAMP	141	510	369

SOURCE CHECK: 26 populated categories; 758 recorded units; 463 missing or unreported units.

A dash means not reported in the source, not zero. Only three categories have supplied requirements and gaps. The 463 units are not confirmed physical losses. “CATWALK FLATFORM SCAFFOLDING” preserves the source spelling; unused row 27 is omitted.

Source: user-supplied green “HAND TOOLS AND OTHERS MONITORING” image. Application records are demonstration data and are excluded.

PLANNING BASIS — EDITABLE ESTIMATES (PHP)

These financial values and task timings are illustrative estimates, not actual company expenses. Only the green inventory quantities are company data. A three-month build is assumed; project fees cover part-time services.

Supporting input	Estimate	Unit / basis
Training duration	2	days
Cloud deployment setup quantity	1	setup service
External backup drive quantity	1	one drive
Open-source / SSL package quantity	1	free package
Planning exchange rate	65	PHP per USD
Hosted backend subscription	25	USD per month [S1]
Administrative time valuation	150.00	PHP per person-hour
Existing inventory-monitoring time	40	person-hours per month
Existing report-preparation time	16	person-hours per month
Existing reconciliation / follow-up time	24	person-hours per month
Proposed inventory-monitoring time	20	person-hours per month
Proposed report-preparation time	6	person-hours per month
Proposed reconciliation / follow-up time	12	person-hours per month

Cost boundaries: coding/testing is covered by the development retainers; PHP 1,000 setup covers account provisioning and deployment checks. The backup drive is a separate offline export copy. Hosted database storage and bundled database backups are paid once; frontend hosting, open-source licenses and SSL add no separate fee.

Labor basis: estimated monthly task time falls from 80 to 38 person-hours. The 42 hours released each month equal 504 hours/year; at PHP 150/hour, productivity value is PHP 75,600/year. This does not reduce payroll. Supplies savings are PHP 4,690/year; after PHP 31,800 recurring costs, net cash impact is negative PHP 27,110/year.

BENCHMARKS AND SOURCES — CHECKED 24 OCTOBER 2026

[S1] Supabase Pro: USD 25/month starting price, within stated quotas. https://supabase.com/pricing

[S2] Cloudflare Pages Free: static hosting limits apply. https://developers.cloudflare.com/pages/platform/limits/

[S3] Registrar: no-markup domain pricing and included SSL. PHP 900 is an allowance. https://www.cloudflare.com/domains/

[S4] Philippine wage context only; company wages are unknown. https://nwpc.dole.gov.ph/ncr/

[S5] Official FX reference. PHP 65/USD is a rounded planning conversion. https://www.bsp.gov.ph/SitePages/Statistics/exchangerate.aspx

Other rates, supplies quantities, hardware allowance and time reductions are analyst estimates, not quotations. Training includes a basic two-day orientation; any additional paid participant overtime needs a revised budget. Confirm taxes, actual usage and remaining development scope before spending.
